SUMMARY

Full-stack developer with strong frontend experience (1+ years) using React and modern JavaScript and TypeScript, and hands-on backend development experience using Node.js, Express, and MongoDB. Built RESTful APIs and MVC-based full-stack applications with authentication and database integration. Delivered 7+ real-world projects covering frontend UI systems and full-stack functionality. Currently expanding backend and system design skills to build scalable applications.

SKILLS

Programming Languages & Frontend Technologies

HTML , CSS , TailwindCSS , Bootstrap , Responsive Design , CSS Grid / Flexbox , JavaScript (ES6+) , TypeScript , React (Hooks, Components, Props, State) , React Router , Redux , Next.js , Git & GitHub , VS Code , Chrome DevTools , Jest , Postman , Node.js , Express.js , MongoDB , Mongoose , RESTful APIs , MVC Architecture , Authentication(Sessions , Cookies) , GraphQL (Basics) , SQL / MySQL (Basics)

Soft Skills

Problem Solving , Adaptability , Communication , Team Collaboration , Attention to Detail , Time Management

WORK EXPERIENCE

Frontend Developer 04/2025 - 09/2025

SMART BLOCKS

- Built 10+ UI features, including product tables, forms, and dynamic API displays across the dashboard and internal pages.
- Developed 6+ reusable React components, improving UI/UX consistency across 4+ pages.
- Integrated Binance API to fetch real-time crypto prices and display side-by-side comparisons with internal platform rates.
- Implemented dark/light theme toggle using Context API, improving user experience.
- Revamped UI across 3+ pages by redesigning sliders, buttons, and input styles using Bootstrap.

Customer Support 05/2023 - 09/2025

SMART BLOCKS

- Designed a ticket routing system that prioritized financial and technical issues as urgent and automatically assigned tickets to the relevant department based on issue type.
- Integrated an AI assistant that reads incoming tickets and suggests relevant knowledge base answers to agents before responding.
- Created 100+ knowledge base articles, reducing repetitive support requests by approximately 25%.
- Developed SLA standards for response times across different ticket categories.
- Prepared categorized canned responses to help agents reply faster and more consistently.
- Implemented a new user onboarding plan, improving beta user retention by 50% and reducing onboarding time by 30%.
- Processed KYC verification for 50+ users using the Shufti Pro dashboard.
- Manually tested 8+ new platform features from the user's perspective and submitted detailed bug reports before launch.

Customer Service Team Leader 01/2022 - 03/2023

Lightic

- Launched customer service operations from scratch, developing core processes and training 7 agents.
- Mentored a 5-person support team, achieving a 25% performance increase over 12 months based on dashboard metrics.
- Implemented several organizational workflow improvements, boosting operational efficiency.
- Reduced response time by 35% and improved customer satisfaction scores by 20% through structured procedures.

PROJECTS

Food Order App (React)

- food-order-app-9ef78.web.app/
- Built a single-page React food-ordering app with full cart management, including add, remove, and quantity updates.
 - Connected the app to a backend API to fetch menu data and submit orders using GET and POST requests.
 - Developed reusable UI components using React Hooks, Context API, and useReducer for state management.

- Built a fully responsive UI that works consistently across all screen sizes.

Shop (Node.js)

Full Stack MVC E-commerce App

shop-mvc.onrender.com/

- Built a full-stack e-commerce application using Node.js, Express, MongoDB, and MVC architecture.
- Implemented user authentication with sessions and CSRF protection for security.
- Developed a product management system with an admin dashboard and file upload functionality using Multer.
- Integrated MongoDB Atlas for cloud database storage and deployed the application on Render.
- Followed MVC structure to separate concerns between models, views, and controllers.

Task Management App (React)

task-management-26d00.web.app/

- Built a task management app with full CRUD functionality using React Hooks and Context API.
- Persisted task data using localStorage to maintain state across page refreshes.
- Developed a clean and responsive UI using Tailwind CSS.

Tic-tac-toe game (React)

tic-tac-toe-58d3a.web.app/

- Built a Tic-Tac-Toe game in React with win and tie detection logic.
- Developed reusable components with clean state management using React Hooks.
- Implemented a responsive UI with dynamic board updates based on player actions.

CERTIFICATION

Node.js – The Complete Guide

40 hours  Udemy

udemy.com/certificate/UC-3dd359b7-b16b-4c7e-9152-f28d3260debf/

- Learned backend development using Node.js and Express.js, covering both fundamental and advanced server-side concepts.
- Built full-stack applications using MVC architecture, MongoDB, Mongoose, and MySQL databases.
- Developed RESTful APIs with authentication, authorization, file uploads, validation, and session management.
- Gained hands-on experience with GraphQL APIs, automated testing, application deployment, and backend security practices.
- Completed real-world projects including an e-commerce platform and a blog application, applying production-style development workflows.

React–The Complete Guide (incl. Next.js, Redux)

71 hours  Udemy

udemy.com/certificate/UC-fa463043-f9d4-46cc-81e4-d45da0672f71/

- Mastered **React fundamentals**, including components, props, state management, JSX, and lifecycle methods.
- Built **responsive, interactive UIs** using functional components and modern React Hooks.
- Implemented **client-side routing** with React Router and integrated apps with backend APIs.
- Managed complex application state using **Context API and Redux Toolkit** for scalable architectures.
- Developed and deployed **full-stack web applications with Next.js**, featuring server-side rendering, authentication, and optimized performance.

McKinsey Forward Program

16 hours  McKinsey & Company

credly.com/badges/4c6b1cdd-0f85-468f-b2b7-72309f53ab7f/linked_in_profile

- Adaptability & Resilience: Developed learning habits.
- Problem Solving: Solved problems with structured thinking.
- Communicating for Impact: Mastered effective communication.
- Relationships & Well-Being: Strengthened relationships and team safety.
- My Digital Toolkit: Explored digital advancements.

EDUCATION

Bachelor's Degree in Civil Engineering

Sep 2016 - Feb 2021

Al al-Bayt University

LANGUAGE

Arabic
